

Vertical & Opera Vertical Shadings Specifications

This innovative patented shade offers the ultimate in light control combining two shades in one sleek operating system.

This revolutionary new window covering will enhance any décor in your home and will beautifully complement our Dual Shades. Its innovative and unique design combines the best features and functionality of horizontal, vertical, and sunscreen shades into a single luxurious shading product.

By incorporating both transparent and opaque fabric sections, these shadings allow for greater control of light and mood while maximizing your view to the outdoors or your privacy. The transparent and opaque fabric sections of the shade repeat by traversing behind each other giving you the following optional settings: light filtering, translucent, room darkening or semi-room darkening. Unlike vertical blinds,

FABRIC DISCLAIMER:

Will not guarantee the exact dye lots as sampled as dye lots may vary within commercial tolerances and colours of fabrics can vary from the samples. For select products, fabric may take on a different colour or pattern when in the stacked position. Some imperfections, which may result from the weaving process, are considered acceptable. Environmental conditions such as heat, cold, humidity etc., may cause slight wrinkling, bowing, puckering and dimpling of fabrics and is considered normal. Slight fraying may occur which is within specification and considered acceptable.
THIS APPLIES TO ALL PRODUCT LINES.
